

# VEEAM has done it.

## CANCOM M365 Backup as a Service.

CANCOM and Veeam make a great team, and that is to your advantage. Use CANCOM M365 Backup as a Service for greater control and end-to-end protection of your Microsoft Office 365 data. With a foundation laid by Veeam and CANCOM as your trusted and reliable system integrator, once again offering you a full solution from a single source. But you already know that.

# How CANCOM M365 Backup as a Service makes your Office 365 solution even better – and even more secure.

Microsoft Office 365 is without question a powerful SaaS platform. It guarantees maximum availability and productivity. But security issues can arise even here. After all: There is no comprehensive backup of the Office 365 data by default. With M365 Backup as a Service from CANCOM as an additional backup solution, you can be confident that everything is under control.

## | These are the challenges you face:

### **Data loss due to accidental deletion.**

- Native recycle bins and version histories only provide limited protection against data loss.
- Simple recovery becomes problematic if data has been irrevocably deleted at all locations or the retention period has been exceeded.

### **Incomplete and imprecise backup and storage policies.**

- The backup and retention policies of Office 365 only allow the secure management of data within a narrowly defined framework. They are no replacement for a long-term, comprehensive backup solution!

### **Internal security threats.**

- Intentional and accidental security issues owing to company employees.

### **External security threats.**

- Malware and ransomware regularly test the protection and security of internal and customer data.

### **Regulations and compliance.**

- Fines, penalties, and legal disputes due to data loss or damage can be avoided in the long term with an additional backup solution.

### **Data structure in MS Teams.**

- A backup solution that also supports Microsoft Teams protects not only data but also settings and links between applications.

### **Management of hybrid Office 365 applications.**

- With the right backup solution, Exchange data can be backed up in both local and cloud-based systems.

## **It's your data.**

**With CANCOM M365 Backup as a Service, you have everything reliably under control.**

For its M365 Backup as a Service solution, CANCOM relies on Veeam, the leading provider of data backup solutions for the efficient management of data in the cloud.

With CANCOM M365 Backup as a Service, you will never again lose access to or control over any of your Office 365 data for Exchange Online, SharePoint Online, and OneDrive for Business. It's the only way to ensure that your data is truly secure and always available.

### **CANCOM M365 Backup as a Service: Advantages.**

- ✓ Protection of Office 365 data against accidental deletion, security threats, and gaps in retention policies.
- ✓ Fast restoration of individual Office 365 objects and files thanks to maximum restoration flexibility.
- ✓ Adherence to statutory provisions and compliance requirements with efficient e-discovery of Office 365 backup objects.

**Don't wait to add extra data security to Office 365 with CANCOM.**
