# M365 Backup as a Service

CANCOM and Veeam form a congenial tandem, and you benefit from it. Use CANCOM M365 Backup as a Service for the backup and for end-to-end protection of your Microsoft Office365 data. With Veeam as the basis, and CANCOM as your trusted and reliable system system integrator, who again offers you everything from a single source with this solution. From a single source. But you know that.

**CANCOM**

# How CANCOM M365 Backup as a Service makes your Office 365 solution even better – and even more secure.

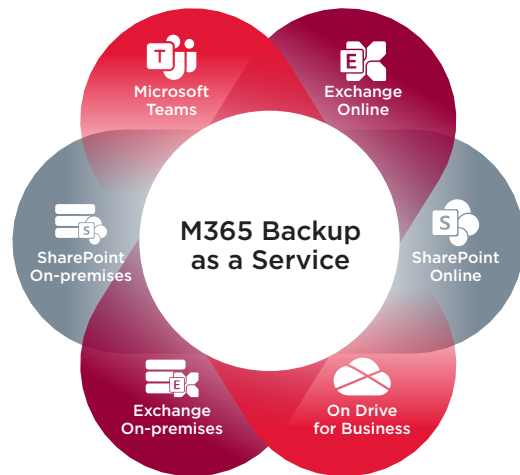

Microsoft Office 365 ist ohne Frage eine leistungsstarke SaaS-Plattform. Ein Höchstmaß an Verfügbarkeit und Produktivität ist garantiert. Doch auch hier kann es sicherheitsrelevante Probleme geben. Ein umfassendes Backup der Office 365-Daten ist erst einmal nicht vorgesehen. Mit einem zusätzlichen Backup – der M365 Backup as a Service von CANCOM – bekommen Sie alles sicher in den Griff.

## It's your data.

**With CANCOM M365 Backup as a Service, you're sure to have everything under control.**

CANCOM relies on Veeam, the leading provider of data backup solutions for efficient cloud data management, for its M365 Backup as a Service.

With CANCOM M365 Backup as a Service, you'll never lose access to or control over all Office 365 data in Exchange Online, SharePoint Online, and OneDrive for Business – this is the only way to ensure your data is truly secure and always available.

### The challenges

#### › Protection against data loss

Although Microsoft implements security measures, data can still be lost. A backup ensures that you can restore important information.

#### › Longer-term retention

Microsoft 365 only stores data for a certain period of time.

#### › Compliance requirements

Some industries have specific regulations regarding data storage and backup. A backup helps you to meet these requirements.

#### › Backup in the event of attacks

Data can be compromised during cyber-attacks, such as ransomware. A backup enables you to restore data without having to respond to ransom demands.

#### › Maintain business continuity

In the event of an unexpected event, backups allow you to quickly resume business operations as you have access to your data.

### CANCOM M365 Backup as a Service – benefits and advantages

✓ Protection of Office 365 data from accidental deletion, security threats and gaps in retention policies.

✓ Fast recovery of individual Office 365 objects and files thanks to maximum recovery flexibility.

✓ Meet regulatory and compliance requirements with efficient e-discovery of Office 365 backup objects.

✓ Options –backup of your Entra ID objects, storage of your backup data in Austria, immutable backup

**Don't wait to add extra data security to Office 365 with CANCOM.**
